RE: Draft IA Sampling and Analysis Plan FY02 Addendum #IA-02-07 (Solar Evaporation Pond Area of Concern)

Dear Mr. Legare:

The Colorado Department of Public Health and Environment and the Environmental Protection Agency have reviewed the above-referenced Sampling and Analysis Plan Addendum. This review concludes that this Addendum can be approved once the following comments are addressed.

This SAP Addendum proposes several areas for additional sampling: around valve vaults, sumps, areas to be regraded, IHSSs and RCRA units, etc. It is assumed that sampling data from areas within the AOC that are not proposed for sampling (e.g., beneath the ponds themselves) are of sufficient quantity and quality so that additional sampling is not required. A statement to that effect should be included. The sampling data displayed in the series of maps is compared to the current RFCA surface soil action levels. A comparison to the proposed new surface soil action levels (2002 PRGs) indicates that beryllium, arsenic and manganese exceed those action levels at several locations.

If you have any questions concerning these comments, please contact Carl Spreng (CDPHE) at 303-692-3358.

Sincerely,

Steven H. Gunderson  
RFCA Project Coordinator  
Colorado Department of Public  
Health and Environment
